DON'T BE THAT GUY WHO GOES INTO THE DRAFT WITHOUT A PLAN. HERE'S HOW TO TACKLE EACH POSITION.

Half the fun of playing Fantasy is building a team from scratch. Some people like to just show up to a draft and pick names without much thought. Those are the folks we beat in Fantasy every single year.

The tiers laid out here are the Fantasy Football version of Waze. You'll know where to expect most players to go, and when certain players become massive bargains if they go unpicked for too long. You'll know which positions you can wait to pick from and which ones you need to prioritize.

But the strategies for each position further detail what

kinds of options you'll have to put your squad together. You could get that amazing quarterback in the first two rounds, but at what cost? Same thing if you opt to pass on running backs until Round 4 or 5. Every option is laid out for you to think about before you draft. Only you can decide what's right for you.

There is no wrong way to build a Fantasy team (unless you take kickers earlier than the last two rounds -- that's a terrible decision and you should be made fun of for it). This advice will help you determine what steps you could take to bring home your league's trophy.

- **THE BOTTOM LINE:** Lamar Jackson's smash-hit 2019 season should remind you of two key principles when it comes to drafting signal-callers: rushing stats mean a lot, and hitting on a late-round quarterback is the ultimate cheat code.
- **RUSHING OPPORTUNITIES:** The more stats a guy can create, the more Fantasy points he's worth. Seven quarterbacks had at least 3,000 passing yards, 20 passing scores, 200 rushing yards and three rushing touchdowns in 2019 six finished as top 10 Fantasy options and four landed in the top five.
- **DRAFT THE NEXT JACKSON:** Your perfect plan to draft a quarterback isn't about getting your hands on Jackson or Mahomes it's about getting the next Jackson or Mahomes with a pick past 75th overall.
- **ARE THEY WORTH IT?** Can you name another player at any position who could reliably average north of 30 Fantasy points per week the way Jackson and Mahomes can? More than one person in every league will see those two as must-haves and grab them before 15th overall. You're gonna have to let them not until early Round 3 are they impossible for anyone to pass up.
- **PLENTY OF UPSIDE**: They're not the only quarterbacks with that kind of incredible potential. Literally every quarterback in the two tiers behind them can produce at a consistent and explosive level. So why reach for a quarterback in Round 1 or 2 when there will be someone with big upside available as late as the middle rounds.
- LATE-ROUND OPTIONS: Tier 5 is ripe with quarterbacks who not only have good wide receivers at their disposal but most are also strong candidates for modest rushing totals. Their upside is better than what's expected of declining players like Jared Goff, Baker Mayfield and Philip Rivers. I love the idea of waiting to draft two of these guys, doubling the chances of having a 2020 breakout lead you to Titletown.
- SUPERFLEX/20B LEAGUES: The best plan would be to take one top-10 quarterback with a pick between Rounds 1 and 4 (Jackson and Mahomes will be top-five picks; you never look dumb taking a quarterback early in these formats) and then two of the high-upside passers between Rounds 6 and 7. That's safer than waiting on the position and taking three from Tier 5, and more cost effective than spending two of your first three or four picks on primo passers and skipping on the great players at other positions

THE BOTTOM LINE: The basic philosophy of drafting running backs hasn't changed in years: You need a lot of them.

ALL ABOUT VOLUME: RBs touch the ball more than WR do, the best ones tend to score more Fantasy points, too, they represent the best trade currency in Fantasy, and the ones who don't start can become stars in an instant with an injury. They're also the most fragile players, so getting as many backs as possible protects your ability to set a decent lineup in case of injuries.

THERE ARE FOUR APPROACHES TO RB

- **DRAFT THEM EARLY:** Assume the running backs in the first four tiers will be gone by the end of Round 5. If you chase running backs early, you'll have at least three on your roster by then.
- DRAFT JUST ONE EARLY: Get a Tier 1 stud, surround him with elite options elsewhere, then pick up as many high-upside running backs as you can in Round 7 and beyond. The lineup plan would then be to mix and match No. 2 backs until you get one you're comfortable starting weekly.
- **DRAFT THEM LATE:** This is when you pass on running backs early, land studs everywhere else first to carry your team, then pick up a bunch of RB who may have a limited role to begin the year but could blossom into studs. It's risky to pass on the thinnest position in Fantasy, but it absolutely pays off when you unearth a good starter. Ask yourself in Round 6 and beyond if the player you're looking at can get a 15-touch per game role. If you think he can, target him. Target pass-catching backs in PPR leagues and goal-line vultures in non-PPR leagues.
- DRAFT THEM THROUGHOUT: This is a casual, balanced approach where you're mindful of the importance of running backs in Fantasy but not exclusively committed one way or the other to drafting them.
- Which path is best? Draft position will play a role you're less likely to draft two running backs with your first two choices if you're slotted seventh overall or later. But if you're picking early in Round 1, either going after running backs with your first two or three early picks or taking just one stud early are the ways to go.

- THE BOTTOM LINE: WR is where the depth is. At least 49 wide receivers have averaged at least 10 PPR points per game in four of the past five seasons — but only 11 wide receivers total have averaged 20-plus PPR points.
- **KNOW YOUR LEAGUE:** Your strategy for drafting wideouts should be based on how many you need to start each week and what your scoring system is. The more wide receivers you can start and the more points you get for receptions, the more likely you'll want to target them.
- **THE SAFER BET:** If you're not the risky type, wide receivers are a safer bet in Fantasy compared to running backs, who get hurt more frequently.
- WHO IS IRREPLACEABLE? The best WR are impossible to replace, but once you get past the first five tiers, expectations are pretty much the same for everyone.
- **IF YOU GO BIG EARLY:** Obviously, if you chase elite wide receivers early, you won't mind settling on lesser talent at other positions. That works for the best in full PPR, especially if you can start at least three wideouts each week.
- **GRAB YOUR STARTERS:** If you really want to feel secure, simply pick enough wide receivers from the first five tiers to cover your starting lineup requirements, then grab another two (maybe three) who have as much upside as possible to break out early on in the year. Many of them are in Tier 7.
- **PRIORITIZE DEEP THREATS:** Faster wide receivers are always preferred, as are wideouts who play with accurate, strong-armed quarterbacks. That's why you'll see No. 2 guys like DK Metcalf and Calvin Ridley ranked ahead of No. 1s such as Julian Edelman or Brandin Cooks.
- **REMEMBER THE DEPTH:** Don't sweat it if you come up short: You should be able to find someone who can give you decent production off the waiver wire once the season starts.

- **BOTTOM LINE:** There's actually a bunch of tight ends who offer some pretty serious upside outside of the elite tier. Like, more than 10. It might be enough to de-emphasize the urgency to draft a tight end.
- **THE ELITE STILL RULE:** It's a stone lock that the first four tight ends that will get drafted in your league, in some order, are Travis Kelce, George Kittle, Zach Ertz and Mark Andrews.
- WR PRODUCTION: The Tier 1 and 2 guys, each with No. 2 WR-like expectations, are worth taking between 15th and 45th overall. You'll save yourself the headache of trying to figure out which tight end to start every week.
- **PATIENCE RULES:** No one else should go until Round 6. That means you should expect a tight end run in Round 7 through Round 9, and you should plan to be a part of it unless you like chasing tight ends off the waiver wire during the season.
- **PLENTY OF UPSIDE:** Grabbing a good tight end before pick No. 100 is a lot easier to do than ever before.
- And even if you pass on tight ends until Round 10-plus, there's a plethora to choose from as early-season starters. Look to Tier 5 for the best options here, because those guys could turn from streamers to starters easily.
- **DOUBLE UP LATE:** It's a good idea to take one before Round 10 and another after Round 10. Investing in a second tight end is never a bad idea so long as it's someone who profiles more as a wide receiver than as an offensive lineman. Mike Gesicki and Jonnu Smith stand out as possibilities this year.
- DOUBLE UP EARLY? It rarely happens, but when a tight end slips in your draft, you shouldn't feel like you
 have to pass on him just because you already drafted a tight end, or want to take a tight end later. You
 wouldn't do that if you saw a running back slip, right? Same thing for a tight end, and for the same reasons
 why you'd take a second tight end late, but with the added bonus of knowing you could start him right away
 as a flex.

2020 OUTLOOK: McCaffrey is the consensus No. 1 pick in any format, and unlike past years it's

hard to find anyone to argue with that. McCaffrey is a workhorse in the truest sense, but even

2020 OUTLOOK: Thomas should be drafted in the first round of every Fantasy draft and could be considered as early as No. 2 overall in PPR. You shouldn't expect Thomas to repeat his record-

2020 OUTLOOK: Kamara is a sure-fire first-round pick in any format. In PPR, one could justify taking him as early as second overall based on his career efficiency and 2019 workload. Kamara's 16-game pace was for 288 touches, which would project to 1,750 total yards and 14 touchdowns at his career rates. His touchdowns should bounce back in 2020 after a down 2019, and if he stays healthy he should be a top-three back in PPR.

DALVIN COOK

2019 STATS: RUSH YDS: 1,135 TD: 13 TAR: 63 REC: 53 YDS: 519 TD: 0

2020 OUTLOOK: If Cook's holdout is short-lived (or non-existent), then taking him with a top-five overall pick is easy peasy. But if he's not a part of Vikings training camp, things get dicey. Cook's potential was on full display in 2019 when he averaged a best-among-RBs 118.1 total yards per game and had the fifth-most total yards at his position despite missing two matchups

2020 OUTLOOK: Mixon averaged 15.3 non-PPR and 17.4 PPR points per game over his final eight matchups of 2019 with very good consistency. The Bengals have a difficult schedule ahead including dates with the NFC North and of course battles against the Ravens and Steelers,

however the offense is expected to improve with Joe Burrow at quarterback. Worth consideration in the first round, Mixon is a better value early in Round 2.

2020 OUTLOOK: Adams is considered among the most reliable and effective receivers in Fantasy Football, and he's a fine Round 1 pick. Shoot, the guy missed four games last season and still nearly finished with 1,000 yards. There's zero doubt of his role in the Packers offense as he's averaged 9.4 targets per game over his past four seasons, and his role in the red zone as Aaron Rodgers' trusted top target is cinched.

2020 OUTLOOK: The Chiefs selected Edwards-Helaire in the first round of the NFL Draft, and he's expected to play a significant role in Kansas City this year, something that became all but certain with Damien Williams' opt-out. That made Edwards-Helaire a first-round pick immediately. A star at LSU, Edwards-Helaire gets to play for Andy Reid and with Patrick Mahomes, giving him a chance to be dominant from Day 1 in the NFL

While his lack of involvement in the passing game is a frustration to PPR managers, his rushing totals and his touchdown production is enough to make you forget it. The only thing you have to fear is how he'll hold up after more than 400 touches (including the playoffs) last year. He's a first-round pick in non-PPR and a second-round option in PPR. After Jordan Howard was hurt last season, Sanders averaged 16.3 PPR points over the final nine games, including four games with at least 21 points. Sanders will share touches with Boston Scott, especially in the passing game, but he should have the chance for a sensational sophomore campaign.

2020 OUTLOOK: Drake finally has the potential to deliver the kind of stats you'd expect from a top-20 pick. He averaged just over 100 total yards and one touchdown per game in eight games with Arizona in 2019, and is a good dual-threat back who should see wider lanes playing alongside running quarterback Kyler Murray. There's plenty to be excited about with Drake that validates consideration in Round 1.

| 2020 OUTLOOK: Hopkins is coming off a down year — his 11.2 yards per reception was the lowes mark of his career and his seven touchdowns were his fewest since 2016. Now he'll have a new offense and a new quarterback, and an abbreviated offseason to get comfortable with both. | 2020 OUTLOOK: You can debate Mahomes versus Lamar Jackson as the No. 1 quarterback this season, and we like Mahomes better in leagues with six points for passing touchdowns, with Jackson in leagues with four points for passing scores. While Mahomes may be a first-round selection in many Fantasy leagues, we recommend drafting him in Round 2. He has all his top weapons back, and he's shown he's the best quarterback in the NFL. Expect another stellar season. | 2020 OUTLOOK: Josh Jacobs has the chance to be a breakout candidate in his second season, and he's worth drafting toward the end of Round 1 or beginning of Round 2 in all leagues. Jacobs had a solid rookie campaign in 2019 when he averaged 14.1 PPR points per game and scored at least 16 PPR points in five outings. He missed three games with a shoulder injury, but he should be fine for the start of the year. And there's even the chance his role in the passing game could expand with DeAndre Washington gone, although Jalen Richard and rookie Lynn Bowden Jr. remain a roadblock for that. Jacobs is the focal point of the Raiders' offense, and he should be a standout Fantasy running back this year. His value is higher in non-PPR leagues than PPR, but Jacobs should be selected in the top 20 overall picks in all formats. |

| | Mack and Michel were two 2019 examples of running backs with strong overall workloads who were nonetheless disappointing for Fantasy. A big reason why was both were TRAP backs, meaning a higher-than-average percentage of their touches were "between the 20s" rush attempts, which tend to be far less valuable for Fantasy than receptions and touches close | to the goal-line. Instead of targeting a between-the-tackles grinder, opt for backs projected to accumulate receptions and touches close to the goal-line. He should be healthy by the start of the year, but will be considered a risky Fantasy option. In six games with Daniel Jones, Engram performed well, averaging 11.2 PPR points per game. The potential to be an elite Fantasy tight end is there, but the Giants also have plenty of weapons around Engram with Saquon Barkley, Sterling Shepard, Golden Tate and Darius Slayton. | 2020 OUTLOOK: For the first time in 21 seasons, Brady will wear a new uniform after signing as a free agent with Tampa Bay and leaving New England. This is a good move for his Fantasy value, and Brady is now someone to consider as a top 10 Fantasy quarterback. He has one of the best receiving corps of his career with Mike Evans, Chris Godwin and the return of Rob Gronkowski, and Bruce Arians should allow Brady to be more aggressive than his final seasons with the Patriots. |

Of course, there's no guarantee he'll play like his old self when he does return. The injury makes Samuel a risky pick, but he was under consideration for a big breakout year after averaging 15.5 PPR points (11.1 in non-PPR) in his final eight regular-season games, and he now looks like a solid pick around No. 100. |

| | 2020 OUTLOOK: After the Colts drafted Jonathan Taylor in the second round, Mack is an eighth- round pick at best. We expect Mack to share early down work with Taylor and see very little, if any, work in the passing game. Mack should start Week 1 because of the abbreviated offseason, but Taylor is far more talented and we expect the rookie to be the primary ball carrier in the second half. That being said, if Mack is able to hold off Taylor for longer than we expect, he could be a steal on Draft Day. | 2020 OUTLOOK: Henry's worth drafting as a No. 1 Fantasy tight end in all leagues with a mid- round pick, and he could emerge as a top five Fantasy tight end this season. Henry will have to adjust to working with a new quarterback and prove he can stay healthy after missing four games in 2019 with a knee injury, but he scored double digit PPR points in eight of 12 games in 2019, and he should have the chance for a big season in 2020. |

Brees has arguably his best collection of weapons ever with Michael Thomas, Alvin Kamara, Emmanuel Sanders and Jared Cook, but he's 41 and not exactly risk free. The Saints have shown a preference for being more run-heavy later in Brees' career, which hurt his production in 2017 and 2018, but he was the third-best quarterback in Fantasy over the final seven weeks of 2019. | 2020 PROJECTIONS: TAR: 95 REC: 65 YDS: 726 TD: 5 FPTs: 166 2020 OUTLOOK: Hurst was the hand-picked replacement for Austin Hooper in Atlanta, and he takes over a role that landed Hooper 5.5 targets per game in 2018 and 7.5 targets per game in 2019. Hurst is just as tall and big as Hooper, but maybe a tad faster but a lot less experienced. He also has to prove he's healthy coming off foot surgery in May, although he's expected to be fine for Week 1. Michel could be the focal point of New England's offense this season with Tom Brady gone to Tampa Bay, but he will continue to share backfield touches with James White. | 2020 OUTLOOK: Kirk is joined by DeAndre Hopkins in the Cardinals offense, which could make opportunity an issue. Kirk has only nine games with over five receptions through two seasons, and has just 14 receptions of 20-plus yards over 111 career grabs. But he did deal with an ankle injury through 2019, and Arizona's offense is in line to run more plays in 2019. Consider Kirk an upside bench wide receiver stash in Round 8 or Round 9. |

| Z | Eric Ebron is gone, and the Colts have been one of the most tight end-heavy passing attacks in the NFL since Frank Reich got there. The only year Doyle has seen more than 100 targets was 2017 and he finished that year as a top-10 tight end. That should be the expectation in 2020 if he can stay healthy. Doyle will be better in PPR, but he should be playable in both formats. | creating an interesting late-round Fantasy option. Dillon had to have been added for a reason, and it could be his likeness to Derrick Henry that got Green Bay hooked, so we could see him as a goal-line fixture for the Packers with potential for him to move on Jones' touches. Between that and the handcuff potential, Dillon is a great target here. | | | | | | |

| | 2020 OUTLOOK: Jackson is back with the Eagles this season, and he could be a key member of Philadelphia's passing game if healthy. JThe Eagles added three rookies in the NFL Draft — Jalen Reagor, John Hightower and Quez Watkins, with Reagor the star as a first-round pick — but Jackson will likely have some big games that make him a decent bench option if you are looking for weekly upside. | 2020 OUTLOOK: Pittman was one of the Colts' second-round picks and they haven't stopped raving about him since. He's worth a 10th-round pick in re-draft, giving the Colts a big-bodied red zone threat who could replace Eric Ebron while also serving as the team's No. 2 receiver. He'll have to beat out Parris Cambell and Zach Pascal to get that role, but that shouldn't be too much to ask. In the event of another T.Y. Hilton injury, Pittman could become a top-20 receiver who is startable in every format. | | | | | | |

| | 2020 OUTLOOK: Edmonds not only has talent, but he'll be one play away from being the Cardinals lead running back working behind starter Kenyan Drake. Until that happens, Edmonds might float around six touches per game. If you're going to chase Edmonds, know that it's more for his handcuff potential than anything else since he figures to rarely come through as even a one-week replacement off the bench. That puts him into consideration starting in Round 10, especially for those who wish to wisely back up Drake with his real-life replacement. | 2020 OUTLOOK: Tate could be the Giants' No. 1 receiver this season, but he will likely be the last Giants WR drafted in all leagues. In the 11 games he played last season (he was suspended four games to open the year and missed one game due to injury), he scored at least 11 PPR points in nine of them. You can draft Tate as a No. 4 Fantasy receiver after Round 8 in all leagues, but he could emerge as a weekly starter if things go right. | | | | | | |

| | 2020 OUTLOOK: The 49ers' 48 sacks last season tied for fifth-best in the league, and that pass rush is the main appeal. However, with plenty of potential shootouts looming in this tough division, you could be looking for another starter frequently. You shouldn't reach on a DST before the final round, but if you do, this isn't the one. | 2020 OUTLOOK: Cousins won't win any popularity contests in Fantasy, but last season was the first time in five years he didn't finish as a top 12 Fantasy quarterback. Still, this is a run-first offense so the upside may not be there, just like last season. Unless the Vikings defense is significantly worse than expected, Cousins is more of a fringe-y starter than one you want to lock in every week. Great depth, though. | | | | | | |

| | 2020 OUTLOOK: Jarwin should be considered a sleeper tight end this season, worth drafting in all leagues with a late-round pick. The Cowboys have 190 targets available from free agent departues this offseason, so there could be opportunity here. Of course, he'll also likely be the No. 4 option at best, so Jarwin is no sure thing. But as a late-round target, he's pretty nice. | 2020 OUTLOOK: Anderson signed with the Panthers, and he should be considered a low-end Fantasy receiver in most leagues. He is only worth drafting with a late-round pick in all formats, because he figures to be the No. 3 option in the passing game for the Panthers behind D.J. Moore and Christian McCaffrey. He'll open things up down the field, but might compete for targets with Curtis Samuel even in that role, so he's best left for your bench as a weekly upside play. | | | | | | |

Now 38, Rivers should be considered a No. 2 Fantasy quarterback, and he's coming off a down year in 2019 with the Chargers when he averaged fewer than 20.4 Fantasy points for the first time since 2012 at 17.1 points per game. Rivers will work behind an upgraded offensive line in Indianapolis, and will play 11 games indoors in 2020, but a complete lack of rushing statistics limits his Fantasy upside. | | | | | | 2020 OUTLOOK: McFarland's impressive speed, hands and vision make him an intriguing late-round pick in Fantasy drafts. The Steelers' depth chart at running back is kind of meh once you get past James Conner, giving McFarland a shot at sprinting past the competition and into a modest role. And if Conner were to miss time with an injury, just as he's done his past two seasons, McFarland could become a legit starter. | | | | | | | |

Ekel is about 200 | 2020 OUTLOOK: Jackson could be headed for a big role this season, and he's worth drafting with a late-round pick in all leagues if he's No. 2 on the depth chart ahead of Joshua Kelley. With Melvin Gordon gone as a free agent to Denver, Jackson will compete with Kelley behind Austin Ekeler. Ekeler will take on a bigger role as well, but Jackson could help fill Gordon's void, which is about 200 total touches from 2019. One of Jackson or Kelley could have low-end starter or flex appeal in deeper leagues. | | | | | | 2020 OUTLOOK: Renfrow should be the third-best receiving option for the Raiders this season behind tight end Darren Waller and rookie Henry Ruggs III, and Renfrow is worth drafting with a late-round pick, with his value higher in PPR after a solid rookie campaign. Over his final seven games, Renfrow had four with at least 17 PPR points, including closing with at least 22 PPR points in his final two. The offseason additions lower his ceiling, but don't be surprised if Carr makes Renfrow his security blanket, giving him sneaky value in PPR leagues. | | | | | | | |

Bridgewater was solid in relief of Brees in 2019, showing great timing and accuracy while keeping most of his targets close to the line of scrimmage. Love has worked his way back from a torn ACL that cost his rookie season, but has earned praise in camp for his ability to contribute in all facets of the game — something that makes him unique in Washington's backfield. Thomas should be targeted shortly after the tier including Jonnu Smithand Blake Jarwin. | | | | | | 2020 OUTLOOK: Herndon should be considered a sleeper tight end this season, and he's someone to draft with a late-round pick. He had a lost year in 2019 due to injuries and a four- game suspension, but he should play a prominent role in 2020. The Jets need help in the passing game, and Herndon should be a primary target for Sam Darnold. You probably don't want to draft Herndon as a No. 1 Fantasy tight end, but he's worth a flier as a second tight end who could turn into a top 10 Fantasy option by the end of the year. | | | | | | | |

He should be drafted in the double-digit rounds of a standard league and higher in Superflex. Minshew was the best rookie passer in 2019 and no longer has to look over his shoulder at Nick Foles. His new offensive coordinator, Jay Gruden, led Andy Dalton and Kirk Cousins to multiple top 10 Fantasy seasons, and Minshew could follow in their footsteps with even small improvement from his 2019 efficiency. | | | | | | 2020 OUTLOOK: Darnold enters his third NFL season with the chance to be a sleeper Fantasy quarterback, but he will likely go undrafted in most formats. In 2019, Darnold missed three games after being diagnosed with mono, and it's hard to say when he was fully healthy after returning to action in Week 6. He averaged just over 16 Fantasy points per game in his final 12 outings, and he'll need to improve on that with an overhauled set of receiving weapons in Year 2 with coach Adam Gase to have much Fantasy value. | | | | | | | |

Kyle Shanahan more routes last year lined up as a receiver (191) compared to tight end (169), finishing with a solid has a way of making his playmakers good, so there's hope for Aiyuk, but patience is warranted. 76.6% catch rate and five of 36 receptions good for 20-plus yards. He wasn't explosive otherwise and only scored twice, but if his playing time picks up there's no doubt his numbers will increase. -JAMEY EISENBERG'S DRAFT STRATEGY FOR 2020

Based on all drafts I've done this offseason, you want to target running backs early, and it's not a bad idea to draft two with your first two picks. There will likely be about 14 running backs selected in the first 24 overall picks, and that will push some amazing wide receiver talent into Rounds 3 and 4. Dive into that pool if you start your team with a running back-heavy approach.

You can wait on a quarterback because plenty of talented passers will fall — remember Patrick Mahomes and Lamar

5 SLEEPERS

- 1 Cam Newton (QB, NE): What if the next, great late-round quarterback isn't some young guy looking for a breakout campaign like Patrick Mahomes or Lamar Jackson? What if it's a former NFL MVP like Newton, who at 31 is switching teams for the first time in his career? If healthy—and it's a big if since he played in just two games in 2019 for the Panthers—he has top-five upside as the starter for the Patriots. He's a great quarterback to wait for on Draft Day in all leagues.

 - 3 Antonio Gibson (RB, WAS)
- LILI 4 Anthony Miller (WR, CHI)

5 Sterling Shepard (WR, NYG): The Giants have a lot of weapons this year with Darius Slayton, Saquon Barkley, Evan Engram and Golden Tate, but don't be surprised if Shepard emerges as the No. 1 receiver for Daniel Jones. Shepard played seven games with Jones last year, and he averaged 14.3 PPR points in those outings. He also had at least nine targets in six of those games. Slayton will likely be the first Giants receiver drafted in all leagues, but Shepard is the better value, especially in PPR. He could emerge as a weekly starter in all formats.

5 BUSTS

1 Lamar Jackson (QB, BAL)

- 2 Derrick Henry (RB, TEN): Henry was amazing last year as the NFL's leading rusher, but I'm worried about drafting him in Round 1, especially in PPR. He just had 386 carries and 409 total touches, including the playoffs, and there could be wear and tear issues coming up. He's also limited as a receiver with his 18 catches last season a career high. The Titans also lost a key member of their offensive line to free agency with star right tackle Jack Conklin signing with the Browns. Henry seems destined to regress in 2020.
- 3 Aaron Jones (RB, GB)
- 4 DeAndre Hopkins (WR, ARI)
 - Keenan Allen (WR, LAC): Allen, in theory, should be good with any quarterback he plays with because he's a standout receiver, but I don't like the loss of Philip Rivers for his Fantasy value. The Chargers will likely go with Tyrod Taylor to open the season and then eventually Justin Herbert, but both guys aren't expected to enhance Allen's production. Allen has been awesome when healthy for most of his career, including three years in a row with at least 97 catches, 1,196 yards and six touchdowns. But those stats should decline. He's still worth drafting as a No. 2 receiver, but he shouldn't be selected before Round 5.

.

Jackson were late-round picks the past two seasons — and tight end is actually deep as well. This isn't a great year to target rookies with the lack of offseason work and preseason games, but you can still draft plenty of them at the right price.

The only two rookies I would invest in early are Clyde Edwards-Helaire (Round 1) and Jonathan Taylor (Round 5), but I'm still looking for sleeper rookies late like Antonio Gibson, Joshua Kelley, Darrynton Evans, Laviska Shenault and Brandon Aiyuk. All of them are worth drafting as lottery tickets in 2020.

5 BREAKOUTS

- 1 Kyler Murray (QB, ARI)
- 2 Miles Sanders (RB, PHI): As long as Sanders remains the featured running back for the Eagles, he has the chance to be awesome. He's worth drafting in Round 1 in all leagues after how he closed 2019. In his final five healthy games (he was hurt in Week 17 against the Giants), Sanders averaged 20.4 PPR points per game, and he had 23 catches over that span. Boston Scott will get some work as the No. 2 option, but Doug Pederson is finally committed to a lead guy in Sanders. He could be one of the next star running backs in the NFL.
- 3 Josh Jacobs (RB, LV)
- 4 Marquise Brown (WR, BAL): In Baltimore's playoff loss to Tennessee, Brown put on a show with seven catches for 126 yards on 11 targets. He gave us a glimpse of how good he can be if he was heavily targeted on a consistent basis. Now, as we know, the Ravens aren't going to throw enough each week to feature Brown. But keep in mind in the first five games of 2019, before Brown missed two games with an ankle injury, he averaged 13.8 PPR points per game on 7.8 targets per outing. He's got the potential to become a starting Fantasy receiver this year.
- 5 Will Fuller (WR, HOU)

HEATH CUMMINGS^P draft strategy for 2020

As usual, I will have no intentional positional strategy for 2020. I will go in with ideas of what I want to do on a round-by-round basis, but the actions of my league mates will greatly influence my draft strategy. Which means that strategy will change from draft to draft.

That being said, I am more inclined than ever to take a running back with one of my first two picks and, I if I have a top-four pick, I'll be taking a running back in the first round for sure. I am very happy to draft Travis Kelce or George Kittle in the second round, and I may take Kelce in the first round a few times. If I miss Kelce and Kittle I'm likely to wait for the

last tight end of the third tier, which for me includes Darren Waller, Evan Engram, Hunter Henry, and Hayden Hurst. I won't take a quarterback early unless it's a superflex or two quarterback league.

Wide receiver is deep enough that you can kind of fit it in around the other positions, but I plan on taking wide receivers in Round 3 and Round 4 in most drafts. Finally, I'm going to pay a lot more attention to quality depth. Yes, I want to take some upside darts in the double digit rounds, but uncertainty surrounding Covid-19 means I will focus more on guys who I can start in a pinch

D.J. Moore (WR, CAR): Through the first 14 games of 2019

what he'll do with even average quarterback play. Teddy

Joe Brady's offense should get Moore into plenty of open

spaces. With a normal touchdown rate, Moore is a top-five

receiver this year, but he has No. 1 upside if he gets just a

(1,354 yards and 10 TD) after the Falcons traded Mohamed

attempts and this passing offense looks to be concentrated

Sanu and we expect him to pick up right where he left off.

Dirk Koetter's offenses are almost always over 600 pass

Calvin Ridley (WR, ATL): Ridley was on a red-hot pace

Bridgewater should be an upgrade over Kyle Allen and

Moore was on pace for 98 catches and 1,342 yards. Imagine

5 SLEEPERS

1 Cam Newton (QB, NE): If you're looking for an upside quarterback in the double digit rounds, you don't have to look any further than Newton. He's finished as a top-five quarterback every year he's played 16 games. When we last saw him healthy, in 2018, he was the No. 6 quarterback in Fantasy through the first 15 weeks of the season, with a 67.9% completion rate and 488 rushing yards. If he stays healthy, Newton still has league-winning upside.

רבה 2 Darrell Henderson (RB, LAR)

3 Sterling Shepard (WR, NYG): We never saw the Giants offense at full strength last year, but Sterling Shepard's 24% target share in games he played was the best of the group. He's the best bet to lead the Giants in targets and the Giants figure to be in a lot of pass-heavy game scripts. Shepard is a solid No. 3 upside who will likely finish in the top 24 if he plays 16 games.

4 Allen Lazard (WR, GB) 5 Jonnu Smith (TE, TEN)

5 BUSTS

1 Lamar Jackson (QB, BAL): Jackson isn't going to repeat last year's 9.0% touchdown rate or 6.9 yards per carry. He probably won't come close. You should anticipate 10 fewer passing touchdowns and up to 300 fewer rushing yards. He could still be the No. 1 quarterback in Fantasy with those numbers, but there's no way he's worth as second round pick. Just as we said with Patrick Mahomes in 2019, you shouldn't draft any quarterback before Round 3.

2 Cam Akers (RB, LAR)

3 Jonathan Taylor (RB, IND): It's no fun calling Taylor and some of the other rookie backs busts, but as long as they're being drafted in the early rounds, I don't feel I have much choice. This year's rookie class didn't get rookie camp or OTAs to prove themselves. It sure sounds like they won't get preseason games either...and full squad scrimmages will be greatly reduced. The Colts and Rams both have perfectly acceptable options at running back with Marlon Mack, Nyheim Hines, Malcolm Brown and Darrell Henderson. Expect those guys to carry the load for the first month of the season at least while Taylor and Edwards-Helaire prove their up to the challenge in limited roles. They could be awesome in the second half, but your record may not be if you spent a top-30 pick on a rookie.

.

4 DeAndre Hopkins (WR, ARI) 5 Jared Cook (TE, NO) yards per target and his 9.2% touchdown rate. Even with touchdown regression, Ridley will be a top-12 receiver.

HEATH'S BIGGEST DRAFT RULES

- **2** Don't draft a rookie in the first 3 rounds
- 3 Don't draft third-down backs (Tarik Cohen, James White, etc.) in non-PPR

DAVE RIGHARD'S DRAFT STRATEGY FOR 2020

The first thing you need to figure out is how comfortable you are with running backs. It's the most shallow position (as usual), so expect a lot of demand early on Draft Day for them. The fewer running backs you'd be OK starting, the sooner you should draft the ones you are comfortable with. I also recommend drafting at least six running backs overall. Waiting on tight end isn't a bad plan, but guarterback is the deepest it's ever been. Assuming you can only

5 SLEEPERS

1 Antonio Gibson (RB, WAS): Gibson played more as a receiver than running back at Memphis, which is perfect because Washington is deep at running back and thin on receiving help! The truth is that the 6-foot, 220-pound Gibson has already drawn comparisons to Christian McCaffrey by his coaches, who were in Carolina when they drafted McCaffrey! I don't know about you, but taking a chance on someone who MIGHT be the next McCaffrey seems like an easy decision even as his cost rises.

2 Jared Goff (QB, LAR): If you're waiting on guarterback and want one who has a deep receiving corps, a suspect run game and a track record of Fantasy success, Goff's your guy. Cooper Kupp and Robert Woods have been very reliable for him, and Tyler Higbee's success carrying over from late last year should keep Goff comfortable. Goff averaged over 24 Fantasy points per game in his final five with Higbee breaking out. A lighter schedule only helps.

Odell Beckham (WR, CLE): We're coming off Beckham's third straight season where injuries impacted him, and his first year in Cleveland where his targets per game were a career-worst 8.3 per game. The man had ONE red-zone catch. It would be a disservice to suggest things will be back to normal with Beckham when the Browns added tight end Austin Hooper to help in the red zone and fullback Andy Janovich to dominate their two-headed run game. In the Browns' new conservative offense, he won't get a ton of opportunities to prove he's still among the game's best. I wouldn't take him until at least Round 4.

Keenan Allen (WR, LAC): Tyrod Taylor and Justin Herbert will be smart enough to know Allen is their best option in the pass game, but their penchant for rushing when a play breaks down (or when a play is called asking them to run) coupled with their individual inaccuracy concerns make both bad passers for Allen. We've seen Allen score six times and get over 1,190 yards in each of his past three seasons. Forget about beating those marks -- matching them without Philip Rivers, the only quarterback he's ever known, puts him in jeopardy of not even coming close to those marks.

.

3 LeVeon Bell (RB, NYJ) **David Johnson** (RB, HOU)

Leonard Fournette (RB, TB)

start one of them, you could wait a while and still find a good value.

What about wide reciever? That's awfully deep too — when you are considering one, consider the likelihood of them getting 120 targets (7.5 per game). Those who you can see it for are the ones you should prioritize.

And pay some attention to handcuffs — it's a certainty that COVID-19 will wreak havoc on Fantasy rosters this season.

BREAKOUTS

- Darius Slayton (WR, NYG): There are a lot of good wide receivers on the Giants, but Slayton is the only one with legit field-stretching speed and a track record to back it up. He had 740 yards and eight touchdowns in 14 games — in his rookie season! If that doesn't sell you, this might: when new Giants playcaller Jason Garrett dialed up the offense in Dallas, he had a vertical receiver get 1,000 yards in 5 of 6 seasons, and had a receiver (sometimes the same quy) catch at least eight touchdowns in 5 of 6 seasons. No one profiles better to be that guy than Slayton.
- 2 Calvin Ridley (WR, ATL)
- 3 Tyler Higbee (TE, LAR)
- **DK Metcalf** (WR, SEA)

DAVE'S BIGGEST **DRAFT RULES**

.

- 1 Know your league rules and scoring system quirks before the draft.
- 2 Handcuff your best players in preparation for a season defined by the impact of COVID-19.
- 3 Take a guarterback with rushing prowess with a late pick.
- 4 Don't draft rookies, players changing teams or players with a rough earlyseason schedule if you're impatient.
- 5 The only thing better than a DST with great early matchups is one you can rely on every week.

BEN GRETCH'S DRAFT STRATEGY FOR 2020

My 2020 draft plan is built around the middle rounds, from about Round 3 or Round 4 until Round 7 or Round 8. This is the range where mediocre running backs who project for solid workloads get pushed up alongside wide receivers with far superior profiles. The way I see it, after star running backs are gone, you should mostly avoid RB for several rounds. That simply is not how drafts go — drafters need to feel like they've addressed their RB depth early, which leads to picks with questionable upside and all the typical downside in premium

5 SLEEPERS

1 Christian Kirk (WR, ARI)

26

2 Mike Gesicki (TE, MIA): Among tight ends, only Travis Kelce and Zach Ertz ran more routes than Gesicki in 2019, and Gesicki lined up as an inline tight end on only 23% of his total snaps (the majority of his snaps came from the slot). He was also fourth among the league's tight ends in air yards, drawing downfield looks thanks to his 97th-percentile SPARQ-x athleticism, per PlayerProfiler. A former second-round pick entering his third year, Gesicki has yet to play up to his impressive profile. But that doesn't mean he can't.

3 T.J. Hockenson (TE, DET)

Mecole Hardman (WR, KC): Hardman was absolutely explosive in his rookie season, turning just 41 targets into 538 receiving yards and six touchdowns as a 21-year-old. The only question is playing time, and his was inconsistent last year, but it's hard not to love the mouth-watering upside he presents as a bench receiver. If we knew Hardman was locked into a full-time role, he'd be worth something like a third- or fourth-round pick attached to the game's preeminent quarterback in a pass-happy offense. He's a perfect stash on the hope that comes to fruition.

5 N'Keal Harry (WR, NE)

5 BUSTS

1 Raheem Mostert (RB, SF)

- 2 James Conner (RB, PIT): Conner is one of several backs in this range of Fantasy drafts with precarious workload projections. Though he stepped up huge after Le'Veon Bell's holdout in 2018, there is far more competition in the Steelers backfield now than there was then. Jaylen Samuels was a rookie that year, but has since carved out at least a minor passing downs role, and Pittsburgh took Benny Snell and Anthony McFarland in the two drafts since that season. Add in that Conner has missed nine games over the past two years, and his late-third round ADP carries plenty of risk.
- 3 David Montgomery (RB, CHI)
- 4 Emmanuel Sanders (WR, NO): The 33-year-old Sanders may have slowed a bit more than is recognized after his late-2018 Achilles injury. Though he started hot with Denver and had a couple of splash games after being traded to the 49ers, he finished under 45 yards in 13 of 20 games, playoffs included. Now Sanders will compete with Jared Cook for No. 3 looks in a great offense, but one where no player other than Alvin Kamara or Michael Thomas has totaled 75 targets in a season over the past three years. That makes his ninth round ADP tough to understand.

.....

5 Tyler Higbee (TE, LAR)

FANTASY FOOTBALL TODAY

rounds.

This means it's a good idea to target elite backs in the first two or three rounds, and then hammer the WR position while it's strong and deep, and even mix in a TE or QB if the value is right. It's uncomfortable to enter Round 9 or Round 10 with just two or even one RB, but those late-round lotto tickets have the potential to gain substantial value if they just get a chance for more touches. That's a sound way to play what projects to be the most unpredictable season we've ever seen.

5 BREAKOUTS

1 D.J. Moore (WR, CAR)

- 2 A.J. Brown (WR, TEN): There are reasons to be wary of Brown, but he looked like a true superstar in the making in 2019. His ADP isn't too steep and factors in plenty of the target downside that exists due to Tennessee's run-heavy structure. Brown may be inconsistent on a weekly basis due to passing volume, but his seasonal target floor is probably higher than you think. And if Tennessee throws more after extremely low totals the past two seasons, Brown's upside is massive.
- 3 Jonathan Taylor (RB, IND): The Colts have PFF's topgraded offensive line heading into 2020 and the easiest schedule by Vegas win over/unders by leaps and bounds. Their schedule is particularly soft in the early part of the season, which should mean plenty of running back touches and room for Taylor to show why he was an elite prospect even if Marlon Mack starts. Concerns about how the shortened offseason could cut into rookie impact are valid, but Taylor's circumstances make him one rookie breakout I'm buying into, and I expect he'll earn an expanded role then be a force down the stretch.
- 4 Will Fuller (WR, HOU)
- 5 Ronald Jones (RB, TB)

BEN'S BIGGEST DRAFT RULES

.

- 1 Target RB in the first two rounds, avoid them after the first 15 or so are off the board, then leave every draft with at least three highupside Round 9 to Round 15 backs.
- 2 After eight rounds, have more wide receivers than running backs in every draft with at least 0.5 PPR.
- 3 Make it a point to have plenty of exposure to young, mid-round wide receivers, starting with D.J. Moore, JuJu Smith-Schuster, Brown, Calvin Ridley, Fuller and Kirk.
- 4 Either pay up for a top-four tight end, wait on someone slipping past ADP in the middle rounds, or target Gesicki or Hockenson late.
- 5 Target the latest of Kyler Murray, Dak Prescott, Russell Wilson or Deshaun Watson in about Round 7, or else wait for a lateround quarterback.
